

The `orcidlink` package

Leo C. Stein 
leo.stein@gmail.com

v1.0.5 from 2023/12/30

Source repo: <https://github.com/duetosymmetry/orcidlink-LaTeX-command>.

1 Introduction

This is a LaTeX style file to add a macro for inserting a linked ORCID logo. The package provides exactly one command, `\orcidlink`.

2 Usage

To use this package, in the preamble include

```
\usepackage{orcidlink}
```

`\orcidlink{\(orcid)}` Insert the ORCID logo (), which is hyperlinked to the URL of the researcher whose iD was specified. Replace the mandatory argument `\(orcid)` with your ORCID — just the digits, not your whole URL. For example, the command `\orcidlink{0000-0001-7559-9597}` will hyperlink to the URL <https://orcid.org/0000-0001-7559-9597>. This is most common in the author list. For example, in the preamble of a RevTeX article, if you write

```
\author{Emmy Noether,\orcidlink{0000-0000-0000-0000}}
```

then the article byline will look something like this:

Emmy Noether  ^{1,*}

as and Astronomu Th.e I.

The macro is used in the author line of this documentation as well.

3 Package Compatibility

This package relies on `hyperref` and `tikz`. If you want to pass options to either of these packages, load them *before* you load `orcidlink`. Similarly, if you want to specify options to e.g. `xcolor`, load `xcolor` before loading `tikz` or `orcidlink`.

4 Implementation

```
1 \NeedsTeXFormat{LaTeX2e}[1994/06/01]
2 \ProvidesPackage{orcidlink}
3     [2023/12/30 v1.0.5 Linked ORCiD logo macro package]
4
5 %% All I did was package up Milo's code on TeX.SE,
6 %% see https://tex.stackexchange.com/a/445583/34063
7 \RequirePackage{hyperref}
8 \RequirePackage{tikz}
9
10 \ProcessOptions\relax
11
12 \usetikzlibrary{svg.path}
13
14 \definecolor{orcidlogocol}{HTML}{A6CE39}
15 \tikzset{
16   orcidlogo/.pic={
