

NAME

`hyperxmp-add-bytecount` – adds/updates `byteCount` specification in XMP packet in PDF file.

SYNOPSIS

hyperxmp-add-bytecount [*options*] *filename.pdf* ...

DESCRIPTION

hyperxmp-add-bytecount adds/updates the `byteCount` specification in the XMP packet in a PDF file(s), with `byteCount` = file size. The XMP packet needs to be of, or compatible with, the format produced from a document that uses the L^AT_EX `hyperxmp` package [⟨https://ctan.org/pkg/hyperxmp⟩](https://ctan.org/pkg/hyperxmp).

If no XMP packet of a compatible form is found in the PDF file, no change is made to the file.

OPTIONS

-help Write usage summary and exit.

-version
 Output version information and exit.

BUGS

Email bug reports to John Collins [⟨jcc8@psu.edu⟩](mailto:jcc8@psu.edu) and/or Scott Pakin [⟨scott+hyxmp@pakin.org⟩](mailto:scott+hyxmp@pakin.org).
